

ANAND JONNADULA

B.Tech — Artificial Intelligence & Data Science (Class of 2026) | Vasireddy Venkatadri Institute of Technology | CGPA: 7.52
anandjonn8@gmail.com | +91 7893409087 | Languages: English, Telugu, Hindi, German
Portfolio: anandjonnadula-portfolio.vercel.app | GitHub: github.com/anandjonnadula

PROFESSIONAL SUMMARY

Full-stack developer and AI engineer (B.Tech Graduate, AI & DS) who ships production-grade software — from a live university ERP built on Next.js/React to calibrated deep-learning medical-imaging systems in Python/TensorFlow. Works AI-first, pairing strong engineering fundamentals with Claude and OpenAI Codex-driven development. Proven campus leader as President of the Student Activities Council.

TECHNICAL SKILLS

- **Programming:** Python
- **Web / Frontend:** React.js, Next.js, HTML + CSS
- **AI Tools:** Claude, OpenAI (Codex / ChatGPT) — AI-assisted development and Prompt Engineering

PROJECTS

University Management System — Full-Stack ERP Platform | Jul 2026

URL: university-website-taupe.vercel.app

Tech: Next.js, React, TypeScript, Tailwind CSS, Prisma ORM, SQLite, JWT

- Built and deployed a complete university ERP: an SEO-optimized public website plus 12 role-based portals behind a single JWT-secured login with RBAC and ownership-scoped authorization.
- Implemented real end-to-end workflows — with automatic parent alerts, assignment grading, fee payments, result publication, an admission offer-to-enrol pipeline.
- Engineered a grounded AI campus assistant that answers only from a verified knowledge base and refuses rather than hallucinates.

Bone Fracture Detection Using CNN — Web App | Dec 2025 – Jul 2026

Tech: Python, Flask, TensorFlow/Keras (MobileNetV2), OpenCV, SQLite, Docker

- Engineered a calibrated two-stage CNN pipeline (transfer learning) achieving 90.4% balanced accuracy, 98.8% fracture recall and 0.976 ROC AUC, with 12-class fracture-type classification.
- Shipped clinical-grade product features: an out-of-distribution input gate, an interactive Grad-CAM explainability viewer, asynchronous inference with live progress, PDF diagnostic reports and Patient/Doctor/Admin portals.

Disease Prediction System — Community Health ML Platform | Jun 2025 – Nov 2025

Tech: Python, Flask, scikit-learn, NumPy, Pandas, HTML/CSS/JavaScript

- Conducted a village-wide health survey in Kantheru and built a symptom-based disease-prediction web application on the collected real-world data, promoting early diagnosis and preventive care in a rural, resource-limited community.
- Combined ML models with model-agreement voting to deliver real-time predictions with confidence levels through a simple web interface usable by residents and health workers.

ACADEMIC DETAILS

- **Class XII**, Sri Vivekananda Central School, CBSE — 83.8% (2022)
- **Class X**, Sri Vivekananda Central School, CBSE — 87.4% (2020)

POSITION OF RESPONSIBILITY

Student President — Student Activities Council, VVIT | Feb 2025 – Jun 2026

- Lead the student council; campus-wide events and student-welfare initiatives, coordinating between the student body, faculty and administration.

Marketing Lead & Representative — Student Activities Council, VVIT | Feb 2023 – Feb 2025

- Represented SAC as Marketing Lead and managed the college's official social-media handles for two years.

VOLUNTEER EXPERIENCE

National Service Scheme (NSS) — Volunteer, Social Services | Nov 2022 – Jun 2026

- Four years of community service & Kantheru village health-survey that led to production of Disease Prediction System.
